INDEX TO VOLUME XLI.

A.

Abstract of the proceedings of the British Association, 40.
Academy of Nat. Sciences Phil., proceedings of, 215.
Address of E. Hitchcock, 232.
Address of Prof. Whewell, 391.
before Bost. Nat. Hist. Soc. 370.
Agassiz and his works, 194.
Alexander, J. W., report on Iron by, 374.
Analysis of ores of lead, silver, copper, &c., 348.
Animals, invertebrate, report on, by Dr. A. A. Gould, 378.
Anatomy and Physiol. of Edwards, 199.
Anodonta and Unio, Des Moulins on, 104.
Asiatic Researches, 92.
Artesian boring at Paris, 209.
Association of American Geologists, 158.
British, abstract of proceedings, 40.
British, 11th meeting, 391.
Astronomy for schools, 389.

B.

Bacillaria, Prof. J. W. Bailey on, 284.
Bache and Lloyd, magnetic observations, 210.
Bailey, fossil infusoria, 170.
on fossil foraminifera of New Jersey, 213.
Infusoria, 284.
Polythalmia, 400.
Barnard, F. A. P., on Daguerreotype process, 352.
Beasts, birds, &c., origin of names of, by J. W. Gibbs, 32.
Beck, L. C., on Sulphur Springs of New York, 182.
Beck, his report on New York, 385.
Beechey, botany of his voyage, 374.
Bibliographical notices, 365.
Birds, beasts, &c., origin of names of, by J. W. Gibbs, 32.
Booth, J. C., on analysis of ores of lead, silver, &c., 348.
Boston Nat. History Society, 189.
Journal of Nat. History, 382.
Botany and Zoology of Brit. Asso., 61
Botanique, Leçons, &c., par St. Hilaire, 371.
Botany, Darby's Manual. 375.
Boyé, antacid powers of magnesia, 159.
British Association, 207.
proceedings of, 40.
Brown on silicon from Paracyanogen, 208.
Browne, P. A. early Geol. section, 183.

C.

Carices, monography, by Kunze, 374.
Chester county cabinet, discourse before, 365.
Chemistry and mineralogy of British Association, 43.
Chlorophyllite, new mineral, 357.
Clark, Sheldon, notice of, 217.
Coal field, southern of Penn., model of, 80.
Conrad, his report on New York, 385.
Contributions to electricity and magnetism, 117.
Contributions to English Lexicography, by J. W. Gibbs, 28.
Cyprinidæ, Indian, 92.

D.

Daguerreotype process, improvement on, 352.
Darby, Manual of Botany, by, 375.
Darlington, Wm., his discourse, 365.
Daubeny, geology of North America, 195.
Denmark, geology of, 402.
Dent, on electrographic gilding, 402.
Des Moulins, on Unio and Anodonta, 104.
Dewey, his report on plants, 378.
Dip, magnetical, in the U. States, 15.
Downing, A. J. on landscape gardening, 216.
Drawings, geological, 206.
Ducatel, his report on Maryland, 385.

E.

Edinburgh Royal Soc., Trans. of, 382.
Edwards, Milne, anatomy and physiology, 199.
Electricity and magnetism, 117.
letter on, Hare to Faraday, 1.
Electrography, gilding by, 402.
Elémens de tératologie, 374.
Emmons, his report on N. York, 385.
his report on quadrupeds, 378.
Endlicher, S., genera plantarum, 373.
English lexicography, J. W. Gibbs, on, 28.

F.

Faraday, letter to, from R. Hare, 1.
Fishes, fossil, W. C. Redfield on, 25.
Flora of North America, 275.
Fly, Hessian, E. C. Herrick, 153.
Forchhammer's principles in peat mosses, 402.

Forchhammer on geology of Denmark, 402.
Fossil fishes, W. C. Redfield on, 25.
foraminifera of New Jersey, 213.

G.

Gardening, A. J. Downing, on, 216.
Genera plantarum, by S. Endlicher, 373.
Geology, J. P. Smith, his lectures on, 389.
Geological Society of London, 190.
drawings, 206.
model, 80.
Geologists, American, association of, 158.
Geology and geography of British Association, 55.
west of Alleghany mountains, by J. Locke, 160.
of North America, by Daubeny, 195.
Gibbs, J. W., on English lexicography, 28.
names of beasts, birds, &c., 32.
Gilding by electrography, by Dent, 402.
Saxton, 402.
Glaciers, ancient, in Scotland, 191.
moraines, &c., 207.
Gould, A. A., report on invertebrate animals, 378.
Gray and Torrey, Flora of North America, 275.
Griscom, John, on steel ore of Duane, New York, 187.
Gunpowder, &c., notes on, 390.

H.

Haldeman, S. S., on Melanians of Lamarck, 21.
Hall, his report on New York, 385.
Hare, R., letter from Sir M. Faraday, 1.
Harlan, Dr. R. on dinotherium, basilosaurus, &c., 179.
Haskins, his Astronomy, 389.
Hawaii, volcanic phenomena in, 200.
Hemp, Manilla, mode of working, 200.
Henry, Jos., on electro-dynamic induction, 107.
Hentz, N. M., new genus of spiders, 116.
Herrick, E. C., on Hessian fly, 153.
meteors of Aug. 1841, 399.
Hessian fly, E. C. Herrick, 153.
History, Natural, Boston Journal, of, 380.
Hitchcock, Ed., address of, 232.
final report on Mass., 384.
his address before the associated geologists, 189.
steps in the sandstone of Ct. river valley, 173.
Hodge, J. T. on secondary and tertiary deposits of the Carolinas, 182.
on secondary and tertiary of southern states, 332.
Hooker and Arnott's Botany, 274.
Horticulture, theory of, 210.
Houghton, Dr. D. magnetic influence of water, 171.
Houghton, Dr. D., on metalliferous veins of Michigan, 183.
joints in rocks, 172.
Hubbard, O. P., on slates with annelides, 163.

I.

Indian Cyprinidæ, 92.
Induction, electro-dynamic, Jos. Henry on, 117.
Inæquitelæ of Latreille, by N. M. Hentz, 116.
Infusoria, by J. W. Bailey, 284.
of rock salt, 193.
Insects, beasts, &c., origin of names of, by J. W. Gibbs, 32.
Institution, national, at Washington, 203.
Iolite, decomposed varieties of, 354.
Iron, report on, by J. W. Alexander, 376.

J.

Jackson, C. T., on mineral manures, 159.
trilobites in Maine, 161.
tin ore from N. Hampshire, 161.
double salt of lime and magnesia, 171.
joints in rocks, 173.
trap dykes, 172–3.
diluvial action in Rhode Island, 176.
Report on New Hampshire, 383.
Jefferson, Thomas, his letter to S. Clark, 230.
Johnson, W., section of Frostburg coal region, 186.
on magnetic iron, 188.
Journal of Nat. Hist., Boston, 380.

K.

Knowledge, human, synopsis of, 389.
Knowlton, Lt., on gunpowder, &c., 390.
Kunze, carices, monography, 374.

L.

Lamarck, Melanians of, Haldeman on, 21.
Latreille's Inæquitelæ, 116.
Leçons de Botanique, &c., by A. St. Hilaire, 371.
Leonard's Lectures on geology, 387.
Lexicography, English, J. W. Gibbs on, 28.
Locke, John, on diluvial scratches, 175.
on magnetic dip, 15.
coal west of Alleghanies, 160.
trilobite, 161.
connexion of magnetism with geology, 171.
Loomis, E., meteorological observations, 310.
reply to, by J. Locke, 15.

M.

M'Clelland, on Indian Cyprinidæ, 92.
Magnetical dip, J. Locke on, 15.
Magnetic observations by Profs. Bache and Lloyd, 210.
Magnetism and electricity, Jos. Henry on, 117.
Manilla hemp, 200.
Mantell, his geology of Surrey, 386.
Manual of botany, by Darby, 375.
Mather, diluvial scratches, bowlders, &c., 174.
his report on New York, 385.
joints in rocks, 172.
Massachusetts, report on geology, by E. Hitchcock, 384.
invertebrate animals, 378.
Mease, Js., on bills of mortality, 306.
Mechanical science, 66.
Medical science of Brit. Association, 65.
Melanians of Lamarck, S. S. Haldeman on, 21.
Meteorological observations by E. Loomis, 310.
register at Montreal, for 1836–40, 330.
Microscopical observations, 205.
Mineralogy and chemistry of British Association, 43.
Mississippi, Polythalmia from, 400.
Model, geological, notice of, by R. C. Taylor, 80.
Money paid by British Association, 394.
Mortality, bills of observations on, 306.
Morton, S. G., exhibits the Ibis religiosa of Egypt, 187.
Murchison, projected tour to Russia, &c., 209.

N.

Names of beasts, birds, &c., by J. W. Gibbs, 32.
Navigation by steam to the Pacific, 358.
New Brunswick, tornado of, 69.
New Hampshire, report on, 383.
Nicklin, P. H., translation of Des Moulins, &c., 104.
Nicollet, on the geology of upper Missouri, 180.
Nomenclator Botanicus, auctore E. T. Steudel, 373.
North America, flora of, 275.
Notice of a geological model, 80.
Indian cyprinidæ, 92.
Notices, bibliographical, 363.

O.

Observations, meteorological, by Elias Loomis, 310.
microscopical, 205.
on bills of mortality, by Jas. Mease, 306.
secondary and tertiary of southern states, 332.
Observations on shooting stars of Aug. 1841, 399.
Origin of names of beasts, &c., by J. W. Gibbs, 32.
Ornithichnites, report on, 165.
Ornithological gallery of British museum, 193.
Oysters, ancient deposits of, 168.

P.

Panama, steam navigation to, 358.
Pantology of Prof. R. Park, 389.
Parasites of Hessian fly, E. C. Herrick on, 153.
Park, Prof. R., Pantology of, 389.
Peat mosses, new substances from, 402.
Pennsylvania, southern coal field, model of, 80.
Pinite of Haddam, 354.
Polythalmia, American, 400.
Popular lectures on geology, 387.
Principles, new, by Forchhammer, 402.
Proceedings of British Association, 40.
learned societies, 158.
Process, Daguerreotype, improvement of, 352.

Q.

Quinby, silver and other ores of Peru, 188.

R.

Red color of marshes in the Mediterranean, 193.
Redfield, W. C., on fossil fishes, 24.
fossil fishes of Conn., 164.
tornado of N. Brunswick, 69.
tertiary fossil shells, 161.
Red matter, shower of, in Tenn., 403.
Register, army meteorological, for years 1826–30, 390.
Remarks on tornado of N. Brunswick, 69.
Report on iron, by J. W. Alexander, 376.
invertebrate animals of Massachusetts, 378.
herbaceous plants of Mass., by Prof. C. Dewey, 378.
quadrupeds of Mass., by Prof. E. Emmons, 378.
geological survey of N. Hampshire, by C. T. Jackson, 383.
final geological, Massachusetts, by E. Hitchcock, 384.
(fifth,) on the geology of Pennsylvania, 385.
on the geology of New York, for 1840, 385.
Maryland, 1840, 385.
Virginia, for 1840, 385.
(fifth,) Tennessee, 385.
Researches, Asiatic, notice of Indian cyprinidæ, 92.
Rogers, H. D., his fifth report on Pa., 385.
W. B., his report on Virginia, for 1840, 385.

Rogers, R. E., on limestones, 171.
Jas., dolomite, a double salt, 172.
H. D., on trap dykes of Penn., 173.
diluvial action, 175.
Pennsylvania coal formations, 177.
resolutions offered by, 189

S.

Salt Formation of Virginia, 214.
Saurians, Fossil, 205.
Saxton, Electrographic Gilding by, 402.
Science, Association for Advancement, 391.
Science, British Association for advancement of, notice of, 40.
Science, Mechanical, of British Association, 66.
Science, Medical, of British Association, 65.
Scriptures and Geology, their consistency, 387.
Sheldon Clark, notice of the life of, 1.
Shepard, Charles Upham, on iolite, 354.
Shooting Stars, 399, 403.
Shower of red matter, 403.
Silliman, B., Evening Address before Association of Geologists, 187.
Letter to William Wheelwright, 362.
Silliman, B. Jr., rhombic structure of Connecticut sandsone, 173.
soil of the Nile, 160.
Smith, J. P., his lectures on geology, 387.
Societies, learned, proceedings of, 158.
Society, Geological, of London, 190.
Society, Royal, of Edinb., trans. of, 382.
Spider, American, new sub-genus, by N. M. Hentz, 116.
Stars, shooting, of Aug. 1841, 399.
Dec. 7, 1838, 403.
Statistics of British Association, 62.
Steam Navigation by Panama, 358.
Steudel, E. T., Nomenclator Botanicus, 373.
St. Hilaire, A., Leçons de Botanique, 371.
Storer, D. H., on Indian Cyprinidæ, 92.
Sulphur Springs of New York, Dr. L. C. Beck on, 162.
Surrey, geology of, 386.
Synopsis of human knowledge, 380.

T.

Talcahuano, letter from, 358.
Taylor, R. C., his geological model exhibited, 177.
description of a geological model, 80.
Taylor, S., on salt of Virginia, 214.
Teratologie, elemens de, 374.
Teschemacher's address before Boston Nat. Hist. Soc., 370.
Tornado of New Brunswick, remarks on, 69.
Torrey and Gray, flora of North America, 275.
Transactions of Royal Society of Edinburgh, 382.
Trego, C. B., on coal of Savage mountain, 186.
Troost, his (fifth) report on Tenn., 385.
on red matter, fallen, 403.
Turtle, fossil, 205.

V.

Vanuxem's report on ornithichnites, 165.
New York, 385.
ancient oyster shell deposits, 168.
Virginia salt formation, 214.
Volcanic phenomena in Hawaii, 200.

W.

Wheelwright, his efforts for steam navigation, 358.
Whewell, Prof., his address at opening the 11th session of Br. Association, 391.

Z.

Zoology and botany of British Association, 61.
